

## LAURAMERONI DESIGN COLLECTION ↙

The Stars collection by Bartoli Design is a range of furniture that has a strong impact, with surfaces divided into increasing and decreasing sequences of rectangles and simple lines inspired by Op Art. Shapes, fragments and light reflect on the polished sheet or fade into a brushed finish for a softer look. The collection is available in polished steel, natural brass, burnished copper and natural copper, and can be combined with wood. The console pictured is made of metal and suits any environment, mixed with classical or modern pieces.

## BATHEMPIRE ↙

BathEmpire supplies popular bathroom products, manufactured to high standards, and offers them to consumers at a great price with a ten-year warranty. The tap, pictured, features ceramic discs instead of rubber washers, which offer an exceptional seal and longer lifespan. The 40-micron chrome finish is thicker than most similar priced bathroom products, which make them a lot easier to clean.

## SANCAL ↗

The Tea collection by Estudihac JM Ferrero consists of armchairs and sofas, combining textures and materials in a classic British style. The pieces are offered with a delicate covering of quilted matt velvet upholstery in sober colours and patterned squares reminiscent of traditional tweed, with a selection of colours from Star upholsteries and Pro2 from the Danish brand Kvadrat, such as beiges, greys, browns, maroons, greens and copper. The hexagonal-quilted and the bi-colour options are key elements for this revised classic, which is contemporary and casual but also elegant and distinguished.

## EBORCRAFT ↙

Eborcraft has designed a boardroom table that features an illuminated panel (pictured here) as part of its Oracle collection. The panel, with its etched glass cover, is inset in the table flush with the surface and the stainless-steel inlaid surround complements the contemporary effect. Oracle has a large selection of table designs, which can be matched with a wide choice of table bases in wood or chrome. Eborcraft specialises in offering numerous options for its designs, enabling clients to create a bespoke appearance at minimum cost.

## HELLAUF ↙

Pixa 1 by Martin Schmitz plays with the visual appearance of the desk. The legs can easily slide or rotate, which offers nearly endless potential for variation - the table can appear chaotic, fragile or even as if it is dancing, enabling the user to change the look of the desk whenever they wish.
