_maintenance

-LEATHER

Leather is a natural product. It is individual, unmistakable and very durable. Natural unevenness, softness and minimal colouring which allows the material to breathe are the features of the best quality leathers. For maintenance and cleaning do not use acids or alkali-based cleaners. Never use stain remover, shoe cream, solvents, floor wax, cosmetics or other aggressive cleaning agents. Do not use scouring agents, steel wool, pot cleaners or similar. We recommend you do not expose the product to strong heat, as this can change its appearance. Please protect the product from abrasion, moisture and other factors so that the surface is not damaged beyond repair. Dust the leather surface regularly with a soft cloth. Use the blunt nozzle of a vacuum cleaner to remove crumbs and sand.

If you use wrong products, the finish of the leather may be damaged seriously; damage appears as time passes, after several cleaning operations. Attention: nubuck grain leather as well as leathers finished with aniline cannot be cleaned at all, if not with a simple dry and soft cloth. Any product could damage irrecoverably the leather!

Nubuck
European bovine hide, chrome tanned, aniline dyed. Nubuck natural grain.

Pixel
European bovine hide, chrome tanned, barrel dyed with aniline. Silkscreen-WR.

Tosca
European origin, chrome tanned, drum dyed, printed and finished to obtain a lightening effect.

Swing
European bovine hide, chrome tanned, aniline dyed. Top-grain leather, smooth matt surface, silky touch.

Skin
European bovine hide, dry vacuum, aniline dyed. Natural look, full hand, silky touch.
