

Swirl - ceiling lamp

design Cesare Arosio

Hanging lamp made up of an acid-etched brass strip in spiral form, available in two different diameters, with LED light and adjustable cables. The unique design generates an upward movement following the curved lines of the lamp which is the source of a diffuse light.

The use of acid-etched brass, hand-crafted, respects Laurameroni usual attention to unique surface treatments to bring out the quality and the real value of our carefully selected materials.

Lampada a sospensione composta da una striscia a spirale in ottone acidato, disponibile in due diversi diametri, con luce LED e cavi regolabili. Il design originale genera un movimento verso l'alto attraverso le linee curve della lampada che è la fonte di una luce diffusa.

L'uso dell'ottone acidato, lavorato a mano, rispetta l'usuale attenzione di Laurameroni per la lavorazione unica delle superfici in grado di valorizzare la qualità e la reale essenza dei nostri materiali, attentamente selezionati.

_materials & finishes

Acid-Etched Brass

The finishes shown are indicative and refer to the entire production range. We recommend that you consult the samples which show the complete range of finishes, including those not shown here. Laurameroni reserves the right to modify the range without warning.

_maintenance

_Natural deviations in structure and colour of metals are part of the authenticity of this surface and are typical of the goods. The surface is specially hand-crafted in several complex manufacturing steps. At the end of the galvanic procedure, the surface is painted with a transparent protective lacquer which prevents further oxidising and discolouring. Differences in colour and structure are not faults, but typical of the goods, and are characteristics of manual processing: every piece is unique. For cleaning and maintenance do not use any acid, solvents or alkali-based cleaners. Do not use scouring agents, steel wool, pot cleaners or similar. Pointed or sharp objects, such as blades or knives, can damage the surface. Anything hot or damp can also be detrimental to the surface. Remove light soiling with a soft cloth and a neutral household cleaning product diluted in water. Clean the metal parts with cold or hand-hot water and finish by immediately drying with a soft cloth.
