

Tubo Tavolo - table lamp

design Mickael Fabris

Table lamp with satin brass structure, adjustable upper disc, and halogen bulb. The disc allows to modify the light direction and to change its intensity according to any need.

The distinguishing elements of this lamp are the use of satin brass and the introduction of the adjustable disc: simple shapes meet high quality materials for an astonishing result.

Lampada da tavolo con struttura in ottone satinato, disco superiore orientabile e lampadina alogena. Il disco consente di direzionare la luce e di cambiarne l'intensità secondo le specifiche esigenze.

Gli elementi distintivi di questa lampada sono l'uso dell'ottone satinato e l'introduzione del disco orientabile: forme semplici incontrano materiali di alta qualità per un risultato sorprendente.

maintenance

Natural deviations in structure and colour of metals are part of the authenticity of this surface and are typical of the goods. The surface is specially hand-crafted in several complex manufacturing steps. At the end of the galvanic procedure, the surface is painted with a transparent protective lacquer which prevents further oxidising and discolouring. Differences in colour and structure are not faults, but typical of the goods, and are characteristics of manual processing: every piece is unique. For cleaning and maintenance do not use any acid, solvents or alkali-based cleaners. Do not use scouring agents, steel wool, pot cleaners or similar. Pointed or sharp objects, such as blades or knives, can damage the surface. Anything hot or damp can also be detrimental to the surface. Remove light soiling with a soft cloth and a neutral household cleaning product diluted in water. Clean the metal parts with cold or hand-hot water and finish by immediately drying with a soft cloth.
