

Work Light Sospensione - ceiling lamp

design Mark Anderson

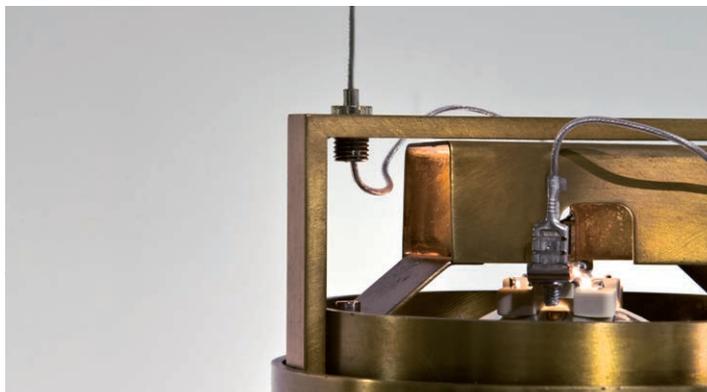

Hanging spotlight in burnished brass arranged for ceiling fastening, available with halogen bulb or LED with 24° or 40° beam angle. Thanks to the adjustable cables, can create different effects and adapts to different contexts.

Elegance and sophistication meet functionality and performance in this hanging spotlight that, thanks to a refined design, can be used in private or public spaces, such as in elegant villas or in luxury reception or waiting areas.

Faretto sospensione in ottone brunito predisposto per fissaggio a soffitto, disponibile con lampadina alogena o LED e con aperture del fascio di luce di 24° o 40°. Grazie ai cavi regolabili, può creare diversi effetti ed adattarsi così a contesti differenti.

Eleganza e raffinatezza incontrano funzionalità e performance in questo faretto a sospensione che grazie a un design raffinato può essere usato in spazi pubblici o privati, quali eleganti ville o reception e sofisticate sale d'attesa.

_materials & finishes

Burnished brass

The finishes shown are indicative and refer to the entire production range. We recommend that you consult the samples which show the complete range of finishes, including those not shown here. Laurameroni reserves the right to modify the range without warning.

_maintenance

_Natural deviations in structure and colour of metals are part of the authenticity of this surface and are typical of the goods. The surface is specially hand-crafted in several complex manufacturing steps. At the end of the galvanic procedure, the surface is painted with a transparent protective lacquer which prevents further oxidising and discolouring. Differences in colour and structure are not faults, but typical of the goods, and are characteristics of manual processing: every piece is unique. For cleaning and maintenance do not use any acid, solvents or alkali-based cleaners. Do not use scouring agents, steel wool, pot cleaners or similar. Pointed or sharp objects, such as blades or knives, can damage the surface. Anything hot or damp can also be detrimental to the surface. Remove light soiling with a soft cloth and a neutral household cleaning product diluted in water. Clean the metal parts with cold or hand-hot water and finish by immediately drying with a soft cloth.
