-maintenance

#### **WOOD**

To maintain the natural wood features and protect them from mechanical and chemical wear, the veneered surfaces are coated with a high-quality transparent varnish. Do not use acid or alkaline detergents, agents with bleaching additives, abrasive powders, steel wool, sponges or the like. Anything hot or humid can cause surface damage. Remove dirt and liquids immediately.

For the cleaning and care, it is best to use a soft, dry cloth. If necessary, the cloth can be slightly dampened and dipped in neutral detergent thoroughly diluted in water. The cloth should only be slightly damp to avoid discoloration or swelling of the surface. Finally, it is essential to gently rub dry surfaces, so that there is no residual moisture.

#### **LEGNO**

Per mantenere il carattere naturale del legno e proteggerlo dall'usura meccanica e chimica, le superfici impiallacciate sono rivestite con una vernice trasparente di alta qualità.

Non usare detergenti acidi o alcalini, agenti con additivi sbiancanti, polveri abrasive, lana d'acciaio, spugne o simili. Qualsiasi cosa calda o umida può causare danni alla superficie. Rimuovere immediatamente sporco e liquidi.

Per la pulizia e la cura, è preferibile utilizzare un panno morbido e asciutto. Eventualmente il panno può essere leggermente inumidito ed intinto in detergente neutro abbondantemente diluito in acqua. Il panno deve essere solo leggermente umido, per evitare scolorimenti o rigonfiamenti della superficie. È infine essenziale strofinare gentilmente le superfici asciutte, in modo che non sussista umidità residua.

\_maintenance

**METAL & LIQUID METAL**

The surface is specially handcrafted in several complex manufacturing steps. The structure of the furniture/panel is coated with metal powder liquified at low temperature and applied on the surface. At the end of the manufacturing procedure, the surface is painted with a transparent protective lacquer which prevents further oxidising and discolouring. Differences in colour and structure are not faults, but typical of the goods, and are characteristics of manual processing: every piece is unique. Do not use any acid, solvents or alkali-based cleaners. Do not use scouring agents, steel wool, pot cleaners or similar. Pointed or sharp objects, such as blades or knives, can damage the surface. Anything hot or damp can also be detrimental to the surface. Remove light soiling with a soft cloth and a neutral household cleaning product diluted in water. Clean the liquid metal coated parts with cold or hand-hot water and finish by immediately drying with a soft cloth.

**METALLO & METALLO LIQUIDO**

Per mantenere il carattere naturale del metallo e tutelare la specifica lavorazione artigianale da ossidazione e scolorimento, le superfici metalliche sono rivestite con una vernice trasparente di alta qualità.

Non utilizzare detergenti acidi, solventi o alcali. Non usare agenti abrasivi, lana d'acciaio, detergenti per pentole, detergenti per vetri, solventi aggressivi, coloranti, candeggina o simili. Oggetti appuntiti o taglienti, come lame o coltelli, possono causare danni alla superficie. Qualsiasi cosa calda o umida può causare danni alla superficie.

Per la pulizia e la cura, rimuovere lo sporco leggero con un panno morbido ed un prodotto neutro per la pulizia della casa abbondantemente diluito in acqua. Pulire delicatamente a mano le parti metalliche con acqua fredda o tiepida ed asciugare immediatamente con un panno morbido.
