_maintenance

METAL & LIQUID METAL

To maintain the natural features of the metal and to protect the specific craftsmanship from oxidation and discoloration, the metal surfaces are coated with a high-quality transparent varnish. Do not use acid cleaners, solvents or alkalis. Do not use abrasive agents, steel wool, pot cleaners, glass cleaners, aggressive solvents, dyes, bleach or the like. Pointed or sharp objects, such as blades or knives, can cause damage to the surface. Anything hot or humid can cause surface damage.

For cleaning and care, remove light dirt with a soft cloth and a neutral household cleaning product well diluted in water. Gently clean the metal parts by hand with cold or warm water and dry immediately with a soft cloth.

METALLO & METALLO LIQUIDO

Per mantenere il carattere naturale del metallo e tutelare la specifica lavorazione artigianale da ossidazione e scolorimento, le superfici metalliche sono rivestite con una vernice trasparente di alta qualità.

Non utilizzare detergenti acidi, solventi o alcali. Non usare agenti abrasivi, lana d'acciaio, detergenti per pentole, detergenti per vetri, solventi aggressivi, coloranti, candeggina o simili. Oggetti appuntiti o taglienti, come lame o coltelli, possono causare danni alla superficie. Qualsiasi cosa calda o umida può causare danni alla superficie.

Per la pulizia e la cura, rimuovere lo sporco leggero con un panno morbido ed un prodotto neutro per la pulizia della casa abbondantemente diluito in acqua.

Pulire delicatamente a mano le parti metalliche con acqua fredda o tiepida ed asciugare immediatamente con un panno morbido.
