

Maxima sliding door - Maxima collection

design Bartoli Design

— Wooden sliding door available in all woods of the collection, with Maxima carving on both sides.

Wooden handle hollowed out in the door thickness and aluminium rail covered in the same finish as the door.

BD 16 SM is also available with the middle panel in glass.

It is also available in the single leaf or double leaf versions.

— Porta scorrevole in legno disponibile in tutte le essenze della collezione, con scolpitura Maxima su entrambi i lati.

Maniglia in legno scavata nello spessore della porta e binario in alluminio nella stessa finitura della porta.

BD 16 SM è disponibile anche con il pannello centrale realizzato in vetro.

La porta è inoltre disponibile nella versione porta singola o porta doppia.

_maintenance

WOOD

To maintain the natural wood features and protect them from mechanical and chemical wear, the veneered surfaces are coated with a high-quality transparent varnish. Do not use acid or alkaline detergents, agents with bleaching additives, abrasive powders, steel wool, sponges or the like. Anything hot or humid can cause surface damage. Remove dirt and liquids immediately.

For the cleaning and care, it is best to use a soft, dry cloth. If necessary, the cloth can be slightly dampened and dipped in neutral detergent thoroughly diluted in water. The cloth should only be slightly damp to avoid discoloration or swelling of the surface. Finally, it is essential to gently rub dry surfaces, so that there is no residual moisture.

LEGNO

Per mantenere il carattere naturale del legno e proteggerlo dall'usura meccanica e chimica, le superfici impiallacciate sono rivestite con una vernice trasparente di alta qualità. Non usare detergenti acidi o alcalini, agenti con additivi sbiancanti, polveri abrasive, lana d'acciaio, spugne o simili. Qualsiasi cosa calda o umida può causare danni alla superficie. Rimuovere immediatamente sporco e liquidi. Per la pulizia e la cura, è preferibile utilizzare un panno morbido e asciutto. Eventualmente il panno può essere leggermente inumidito ed intinto in detergente neutro abbondantemente diluito in acqua. Il panno deve essere solo leggermente umido, per evitare scolorimenti o rigonfiamenti della superficie. È infine essenziale strofinare gentilmente le superfici asciutte, in modo che non sussista umidità residua.
